DISE Server web user interface.

1.01 THE LOGIN SCREEN

Here you enter your *network*, *username* and *password* in order to log in.

One customer can have several users who can be authorized to see each other's content, or not. Different customers **cannot** see each other's content or players.

 System

✓ No changes to publish

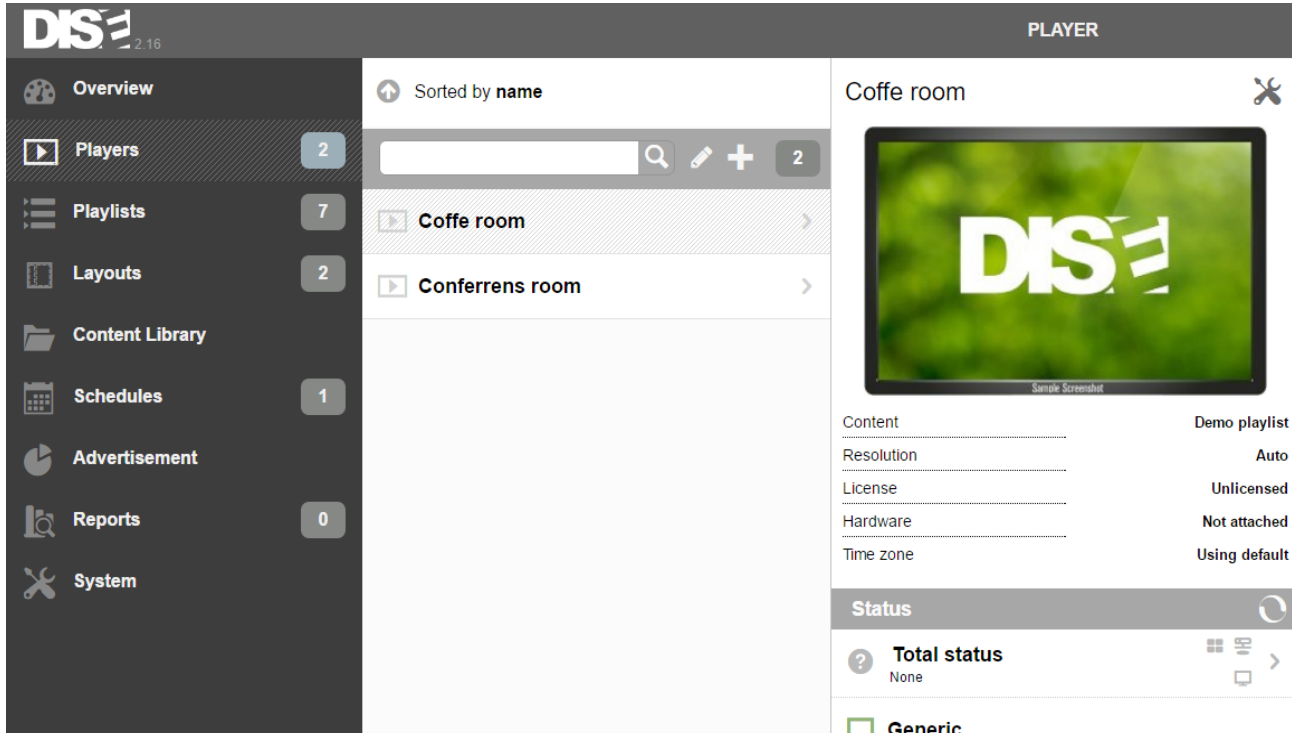

✓ Everything is OK!

This is the first tab in the menu. Here you get an overview of the system and player status, as well as warnings if there is a problem.

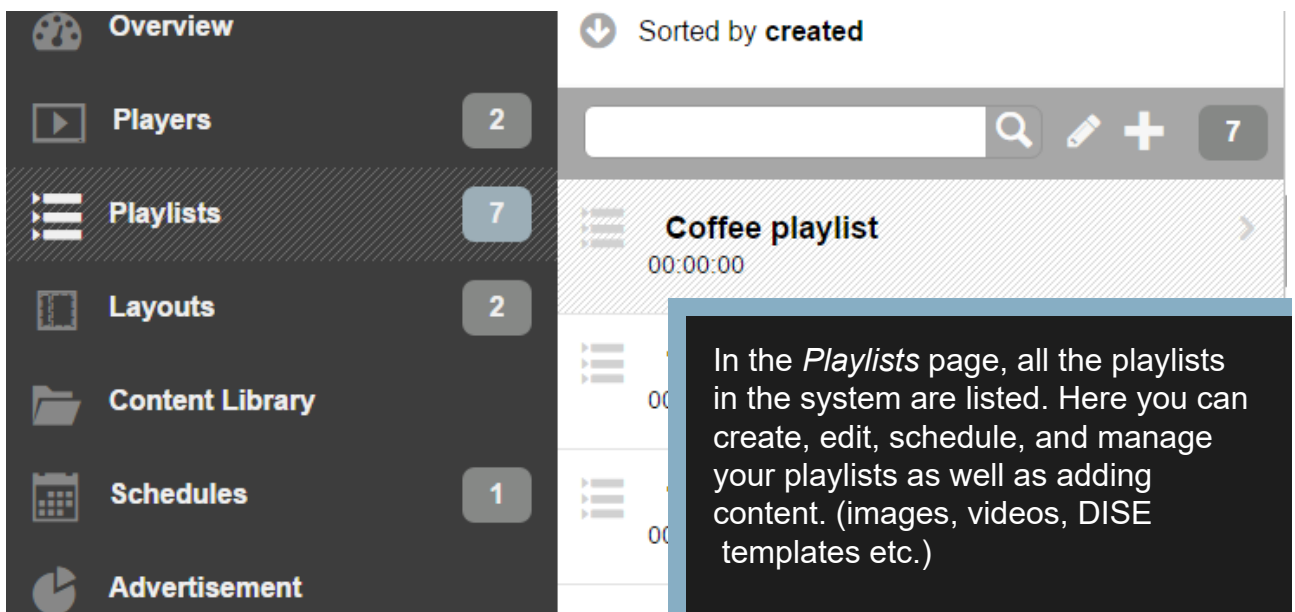

In the *Overview* tab you will also find the publish option. To publish means that changes made in the interface are sent to the players. It is not until you have published the changes that they will show.

1.03 PLAYER

On this page you get a list of players that are connected to the server. You can immediately see which players are experiencing problems, as a warning will show next to the player in the form of a **red** icon. If the icon is **green** then everything is working as it should. Click on a player to view more details, status and overall information.

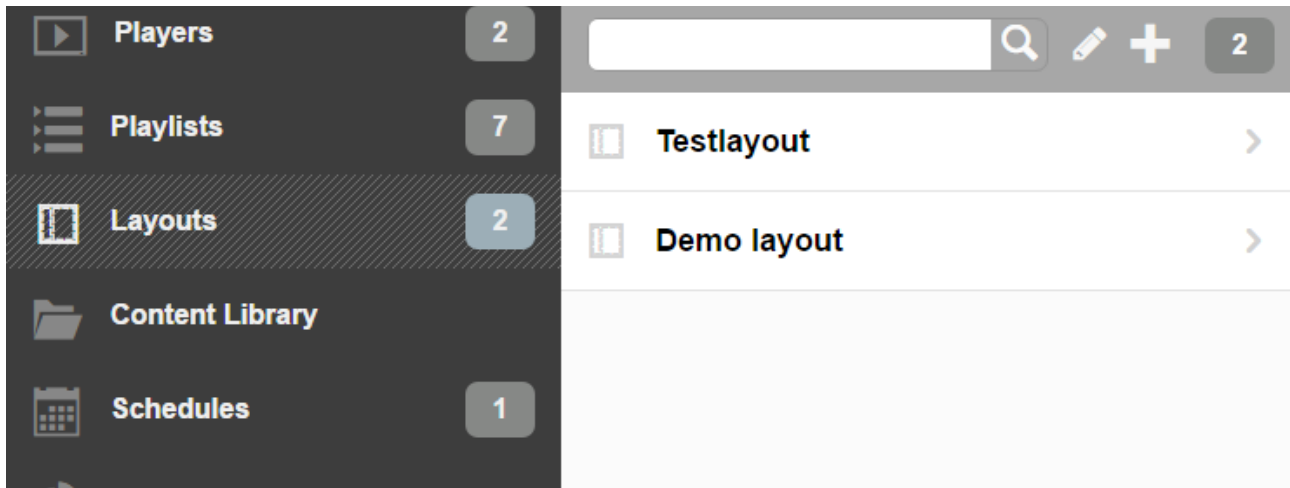

1.04 PLAYLISTS

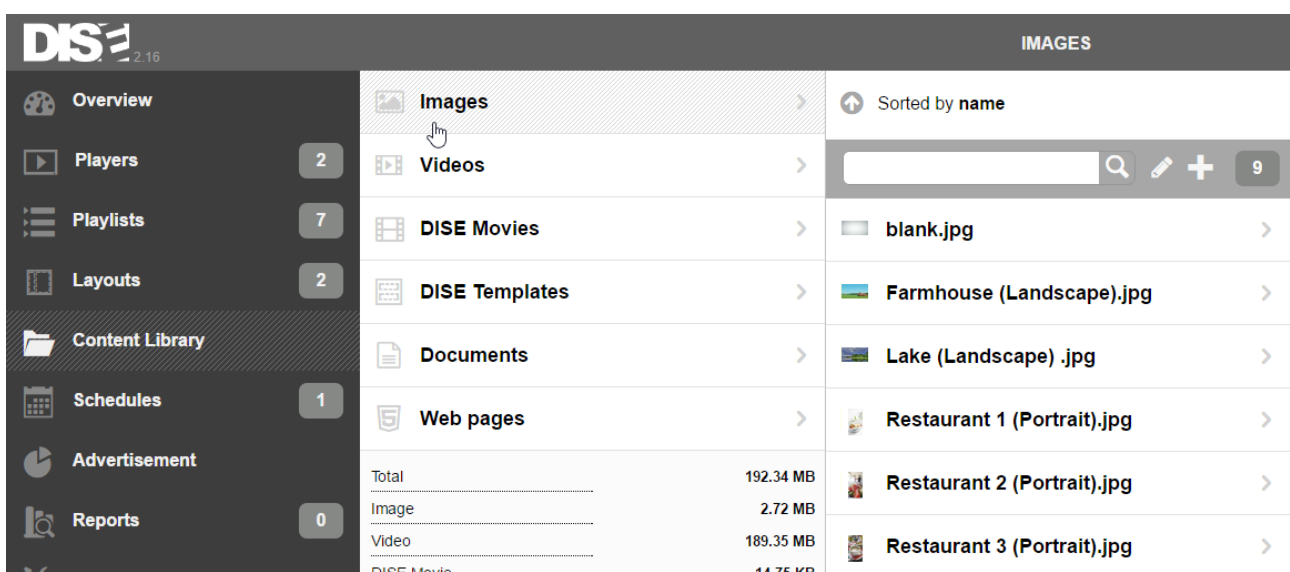

1.05 LAYOUTS

Layouts lets you place playlists into zones or layers on the screen. It makes it easy to have your logotype on top of all content at all times or put the weather feed on one side of the screen. All of this whilst still having DISE Movies, templates, videos or images playing on the rest of the screen.

1.06 CONTENT LIBRARY

On this page can you view and upload images, videos, URL and other files available for you to use as content. Everything on the list is stored on the server. By selecting a file you can view more information about the object like image size, when it was last updated and so on.

1.07 SCHEDULES

DIS 2.16

SCHEDULE

Sorted by **name**

Monday to Thursday

Schedule rules

Monday to Thursday
on Mo, Tu, We, Th

Here you have the ability to create your own flexible schedules. They can be used for several playlists which simplify if you have a lot of playlists that you want to configure to be active for example only during the opening hours.

1.08 REPORTS

DIS 2.16

Sorted by **name**

2016-09-13 11:04:52
Ready

On the *Reports* page can you monitor the health of all components as well as information about what content that has been shown on which screen and at what time.

1.09 MY ACCOUNT

On *My Account* page the logged in user can see and change settings such as password, language, user details and various interface settings.

Adding and publishing content.

2.1 ADDING CONTENT

In order to add DISE movies and DISE Templates you need to connect the DISE Composer to DISE Server (find out how in the “Composer Guide”). All your files will be saved on the server and shown in a list.

2.2 CREATE A PLAYLIST

The next step is to create a playlist of the content that you just added in the *Content Library*. To do this go to the *Playlists* tab and click on the *plus symbol* to add a new playlist. Give the playlist a name and then enter a short description (optional). Then set a default duration for the items in your playlist.

Coffee playlist

Created 2016-08-17 Duration 00:00:00

Updated 2016-09-13 Transition None

Sorted by **created** **UPLOAD** **ADD**

Playlist items **Add** 0

Created	Duration	Updated	Transition
Test 2	DISE Playlist		
Test	DISE Playlist		
corporate_welcome	DISE Template		
DISE movie.mp4	Video		

2.3 ADD A PLAYER

In order to send your playlist to the screens you need to make a *Player*. Go to the *Players* tab and then click on the *plus symbol* to add a new player. In the dialog appearing, enter a name of your choice to give the player. A good tip is to name it to the location, for example the “reception”.

To add the content that you have created to the player, simply choose one of your playlists by typing in its name in the search field OR press the arrow-down key on your keyboard to see a list.

The last step to adding a Player is the *discovery code*. (If you don’t know how to obtain your discovery code, then have a look at our other installation guides) Enter the 6-digit discovery code then click Save.

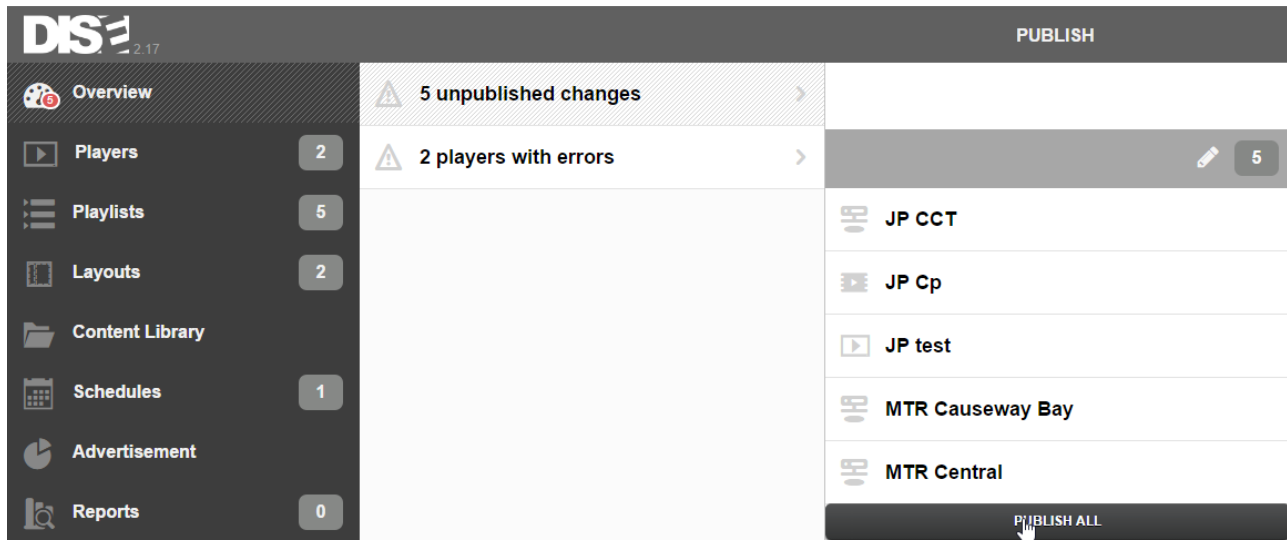

The screenshot shows the 'Add Player' dialog box. On the left is a sidebar with navigation icons and labels: **Players** (2), **Playlists** (7), **Layouts** (2), **Content Library**, **Schedules** (1), **Advertisement**, **Reports** (1), and **System**. The main area contains the following fields and controls:

- NAME**: A text input field.
- DESCRIPTION**: A text input field.
- CONTENT**: A section with three tabs: **PLAYLIST** (selected), **CIRCUIT**, and **LAYOUT**.
- PLAYLIST**: A search input field with a magnifying glass icon.
- DISCOVERY CODE (6 DIGITS)**: A text input field.
- CANCEL** and **SAVE** buttons at the bottom.

A blue arrow points from the bottom of the dialog box towards the bottom of the page.

2.4 PUBLISH

Once any changes has been made you will get a notification about it at *Overview*. Click on the *Overview* tab and go to *Unpublished changes*. Then click on either *PUBLISH ALL* or press the *Edit* button to publish the changes individually.

DONE!

Congratulations on completing the DISE Server guide!
Now you know how to create a *playlist*, set up a *player* and how to *publish* your content!

We hope this guide helped you achieve your goals with digital signage. If you have any more questions regarding the usage of our DISE products, please contact us by e-mail or phone. More information can be found at our website: www.dise.com
